Why Are We Moving to 365

□□ Why We’re Moving to Microsoft 365 — What It Means for You

You may have noticed changes in your email setup—this is because we’re upgrading from Exchange to **Microsoft 365**. Here's what’s changing, and more importantly, **how it benefits you**.

□□ New Outlook No Longer Supports Exchange

Microsoft has released a **new version of Outlook**, included with Windows 11 and coming to other platforms soon. One major change:

□□ **It no longer supports Exchange email accounts.**

What this means for you:

- You won’t be able to add or use your old Exchange account in the new Outlook.
- As Microsoft continues updating its software, support for older email systems will gradually fade.

□To make sure your email stays reliable and interruption-free, we’re moving to **Microsoft 365**.

What You Get With Microsoft 365

This change isn’t just behind-the-scenes—it brings real improvements to how you work every day.

Use Your Email Anywhere

- Works seamlessly on **your phone, tablet, and computer**
- No more VPNs or special setups—**just log in and go**

A More Reliable Inbox

- Faster email delivery with **fewer delays or errors**
- Fully compatible with the latest **Outlook desktop and mobile apps**

Safer and Cleaner

- Enhanced **spam filtering**
- Built-in **protection from unsafe links and attachments**

Everything Syncs Automatically

- Email, calendar, and contacts **stay in sync** across all your devices
- Make changes in one place—they show up **everywhere**

Designed for Simplicity

- A **clean, modern layout**
- Easier **search** and smarter organization
- Built-in tools like **Teams, Word, and Excel** (when needed)

□□ Bottom Line

Microsoft is phasing out support for Exchange—especially in the **new Outlook**.

This move to Microsoft 365 ensures your email remains:

- Reliable □
- Secure □
- Accessible from anywhere □

You're not losing anything—you’re gaining a better experience that just works
